Teaser	If you handle animal by-products as a company, you need an authorization.
Volltext	<p>All residues from animals that are not suitable or intended for human consumption are animal by-products.</p> <p>If you as a company handle animal by-products, you must recycle and safely dispose of them in such a way that they do not endanger human or animal health or the environment.</p> <p>Animal by-products are divided into 3 risk categories according to the degree of danger they pose to humans and animals.</p> <ul style="list-style-type: none"> • Category 1 - High-risk material, for example: <ul style="list-style-type: none"> • Carcasses or parts of carcasses of animals suspected or affected by Transmissible Spongiform Encephalopathy (TSE), • animals that have been killed as part of TSE eradication measures, and • pets, zoo and circus animals • Category 2 - medium risk material, for example: <ul style="list-style-type: none"> • Animals that died by means other than slaughter or killing for human consumption, including animals killed for disease control purposes, • fetuses, ova, embryos and semen not intended for breeding purposes and poultry dead in the egg shell (chicks) • animal by-products containing residues of authorized substances or contaminants that exceed the limit values • Category 3 - low-risk material, for example: <ul style="list-style-type: none"> • Carcass parts and parts of animals slaughtered for

Modul

Sachverhalt

human consumption when they have not been used for human consumption for economic reasons

- Materials from aquatic animals, molluscs and crustaceans

- Parts of live animals, such as

- blood,
- wool,
- feathers,
- hair and
- raw milk

If you want to process animal by-products, you generally have to apply for a permit. This applies in particular to the following activities:

- Processing of animal by-products by
 - pressure sterilization,
 - by processing methods or
 - approved alternative methods
- disposal as waste by incineration of animal by-products and derived products, except in relation to plants or establishments holding an operating license
 - Disposal or recovery of animal by-products and derived products, if they are waste, by co-incineration, except in relation to plants or establishments holding an operating license
- Use of animal by-products and derived products as fuel
 - Production of pet food
 - Production of organic fertilizers and soil improvers
 - Conversion of animal by-products and/or derived products into biogas or compost in biogas plants and composting plants
- Treatment of animal by-products after collection, in the form of activities such as
 - sorting,
 - cutting,
 - cooling,
 - freezing,
 - salting,
 - removal of hides and skins or specified risk material
- Storage of animal by-products

Modul	Sachverhalt
	<ul style="list-style-type: none"> • Storage of derived products
Erforderliche Unterlagen	<ul style="list-style-type: none"> • Copy of an identification document, e.g. identity card • Site plan of the plant or business <ul style="list-style-type: none"> • In the case of biogas plants and composting plants, sufficient separation of livestock and plant must be demonstrated if external manure is used • Floor plan of the building or buildings; only one site plan is required for biogas and composting plants • Pest control plan • HACCP concept (HACCP stands for "Hazard Analysis Critical Control Points"), which includes the following information: <ul style="list-style-type: none"> • Processing plants • Biogas or compost plants • Pet food plants • Treatment or storage of several categories of animal by-products and derived products in the same plant or business • Description of operation
Voraussetzungen	<ul style="list-style-type: none"> • They comply with the infrastructure and equipment requirements applicable within approved establishments and plants They comply with the hygiene requirements for all types of treatment of animal by-products and derived products, including measures to modify the hygiene rules for establishments or plants; <ul style="list-style-type: none"> • They meet the conditions and technical requirements for handling, treatment, transformation, processing and storage of animal by-products or derived products and conditions for waste water treatment; • You provide evidence for the purpose of validating the handling, transformation and processing of animal by-products or derived products with regard to your ability to prevent risks to human and animal health; • You meet the conditions for handling animal by-products or derived products from more than one category, Category 1 material, Category 2 material, Category 3 material in the same establishment or plant <ul style="list-style-type: none"> • They meet the requirements for the prevention of cross-contamination during the storage, treatment or processing of animal by-products in a separate part of a plant or establishment;

Modul	Sachverhalt
	<ul style="list-style-type: none"> • for biogas and composting plants: they meet the standard processing parameters for biogas and composting plants; • for incineration and co-incineration plants: they meet the requirements for incineration or co-incineration in high and low capacity plants • for use as fuel: they meet the requirements for the use of animal by-products and derived products as fuel <p>The competent authority shall only approve plants or establishments if an on-site inspection prior to commencement of operations has shown that the relevant requirements are met.</p>

Kurztext	<ul style="list-style-type: none"> • animal residues not intended for human consumption are animal by-products; plants and establishments handling animal by-products, such as processing plants, incineration and co-incineration plants, composting and biogas plants, pet food plants, fertilizer production plants, treatment plants for animal by-products after their collection, storage plants for animal by-products and their derived products require a permit for this activity. • are divided into 3 categories:

Modul

Sachverhalt

- Category 1: High risk material, for example:
 - Carcasses or parts of carcasses of Transmissible Spongiform Encephalopathy (TSE) suspected or affected animals,
 - animals that have been killed as part of TSE eradication measures, and
 - pets, zoo and circus animals
- Category 2: Material with medium risk, for example:
 - Animals that have died by means other than slaughter or killing for human consumption, including animals killed for disease control purposes,
 - foetuses, ova, embryos and semen not intended for breeding purposes and poultry lying dead in the egg shell (chicks)
 - animal by-products containing residues of authorized substances or contaminants that exceed the limit values
 - Category 3: Low-risk material, for example:
 - Carcass parts and parts of animals fit for human consumption if they are not used for human consumption for economic reasons
 - Materials from aquatic animals, molluscs and crustaceans
 - Parts of live animals such as blood, wool, feathers, hair and raw milk
 - The following activities are subject to authorization:
 - Processing of animal by-products by
 - pressure sterilization,
 - by processing methods or
 - approved alternative methods
 - disposal as waste by incineration of animal by-products and derived products, except in relation to plants or establishments holding an operating license
 - Disposal or recovery of animal by-products and derived products, if they are waste, by co-incineration, except in relation to plants or establishments holding an operating license
 - Use of animal by-products and derived products as fuel
 - Production of pet food
 - Production of organic fertilizers and soil improvers
 - Conversion of animal by-products and/or derived products into biogas or compost in biogas plants and composting plants
