Teaser	The waste disposal of private households and thus also of problematic substances from private households is the responsibility of the districts and independent cities as public waste disposal providers.
Volltext	<p>The disposal of waste from private households, including problematic substances/pollutants, as well as disposal waste from other areas of origin is the task of the public waste disposal authorities (districts and independent cities).</p> <p>Problem substances are wastes which, because of their material properties, must not be disposed of together with household waste, as they can endanger health and/or have harmful effects on the environment. Further regulations on problematic substances/pollutants are laid down in the individual waste disposal statutes and fee statutes. This includes, among other things, information on waste charges, waste calendars (collection intervals) and existing collection and delivery systems (pollutant mobile, recycling centers).</p>
Erforderliche Unterlagen	Please ask the public waste disposal authority responsible for you which documents you need to submit.

Modul	Sachverhalt
Voraussetzungen	Consultation with the public waste disposal authorities required
Kosten	Consultation with the public waste disposal authorities required
	As for waste disposal as a whole, there is no nationwide uniform fee regulation for the disposal of problematic substances by the districts and independent cities. Information on the costs incurred can be found in the respective waste fee statutes of your public waste disposal authority.
