<b>Kurztext</b>	<ul style="list-style-type: none"> <li>• Insured persons are entitled to benefits in the event of sterilisation required by illness.</li> <li>• The claim exists for both women and men.</li> <li>• Sterilization required by illness occurs when treatment is necessary to protect personal health. This is the case, for example, in women for whom pregnancy would be harmful to health and another form of contraception is not possible or reliable.</li> <li>• On the other hand, there is no medical indication if, due to the state of health of one of the parents, there would be a risk of the child becoming ill in the event of pregnancy, since in this case sterilisation is not a curative but a prophylactic measure.</li> <li>• Sterilizations that are not due to illness and are to be carried out as part of individual life planning cannot be carried out at the expense of the GKV.</li> </ul>
