Sachverhalt

notification is only possible in the following cases:

- Low-exposure activities (No. 2.8 TRGS 519)
- work on a small scale (No. 2.10 para. 3 TRGS 519), i.e. outdoor asbestos-cement panels of less than 100 m².
- Maintenance measures (No. 17 TRGS 519).

Before the start of the work, a supplementary display of place and time must also be provided.

Hints:

Asbestos is a carcinogenic hazardous substance and was banned at national level as early as 1993. Since 2005, asbestos has also been banned throughout Europe by the REACH regulation. Asbestos products that were already installed before the ban may currently continue to be used until they are removed or until the end of their useful life, but an obligation to replace or remove them is being discussed.

Work on asbestos-containing parts of buildings, equipment, machines, plants, vehicles and other products is generally prohibited.

Only demolition, rehabilitation and maintenance work (ASI work - see definition according to No. 2 TRGS 519) according to the Hazardous Substances Ordinance is permitted. Processes that lead to the removal of asbestos-containing surfaces, such as grinding, pressure cleaning, brushing and drilling, are prohibited, unless they are so-called low-emission processes. The following are also prohibited:

Covering, superstructure and elevation work on asbestos-cement roofs and wall cladding

Cleaning and coating work on uncoated asbestos-cement roofs and wall cladding

Asbestos-containing materials resulting from demolition, rehabilitation and maintenance work must be disposed of.

The safety requirements of the Ordinance on

	Hazardous Substances for activities on asbestos-containing materials and the ban on asbestos also apply to private households.
Erforderliche Unterlagen	<ul style="list-style-type: none"> • Risk assessment / work plan according to Annex 1.4 TRGS 519 • Additional information for demolition and rehabilitation work on weakly bound products in accordance with Annex 1.5 TRGS 519 • Operating instructions (see sample in Appendix 1.6 and 1.7 TRGS 519) • Certificate of competence according to Appendices 3 and 4 TRGS 519
Voraussetzungen	<p>Demolition, remediation and maintenance work on asbestos-containing materials may only be carried out by specialist companies. At least one competent person authorised to issue instructions must be present on site during the work. Certificates of competence are valid for a period of 6 years. Further information on the specialist courses can be found in Appendices 3 and 4 of TRGS 519.</p> <p>Demolition and remediation work on asbestos-containing materials in weakly bound form may only be carried out by specialist companies that have official approval.</p> <p>Compulsory occupational health care in accordance with the Ordinance on Occupational Health Prevention must have been carried out before the start of work for all employees who carry out activities with asbestos-containing materials.</p>
Kosten	Only in case of shortening of the deadline: at least 350.00 euros plus expenses
Verfahrensablauf	<p>Object-related displays are based on the information provided for the location of the object.(e.g. construction site) competent occupational health and safety authority.</p> <p>Company-related notifications must be sent to the occupational health and safety authority responsible for the place of business.</p>

Modul
Sachverhalt

In the case of small-scale work, the location and time display is required in addition to the company-related display. This notification must be sent to the occupational health and safety authority responsible for the location of the object (e.g. construction site).

Please use the available forms to create the advertisement.

Bearbeitungsdauer

1 Tag(e)

Frist

Activities with asbestos-containing materials (Annex 1.3 TRGS 519) must be reported to the competent occupational health and safety authority at least 7 days before the start of the work. There is no deadline for the notification of place and time (Annex 1.2 TRGS 519) in addition to the company-related notification. This notification can be made at short notice. There is also no deadline for company-related notifications (Annex 1.1 TRGS 519). In the case of object-related notifications, the competent occupational health and safety authority may agree to a shortening of the deadline in urgent cases. For this purpose, a shortening of the deadline can be requested. In the event of approval, the applicant will receive approval from the occupational health and safety authority to shorten the deadline. Costs are charged for the permit. Work may not be started until the permit has been obtained.
