Teaser	<p>You would like to use a plant protection product on your farm that is not authorised for use in this crop. Then you need a case-by-case operating permit, which must be applied for at the official plant protection service.</p>
Volltext	<p>Plant protection products may only be used if:</p> <ul style="list-style-type: none"> • the funds are authorised • the authorisation is not suspended and only • in the valid indications specified in the authorisation (culture and harmful organism) • in accordance with the applicable rules of use laid down in the authorisation. <p>In many horticultural crops, which are grown only on a small scale, but also in special agricultural crops, the use of plant protection products is limited or not given, since there are usually only a few approved products for this. However, the problem of "control gaps" can also exist for certain harmful organisms which cause damage only sporadically and in certain areas worthy of control and have therefore not been taken into account in regular authorisations.</p> <p>In these situations, an operational authorisation for the use of an authorised plant protection product in an additional indication may be applied for on a</p>
