Teaser	Conformity assessment procedures must always be carried out for products in potentially explosive atmospheres.
Volltext	<p>The provision, issue or first use of equipment and protective systems for potentially explosive atmospheres, as well as their components and required safety, monitoring and control devices, is regulated by the Product Safety Act.</p> <p>Normally, a conformity assessment procedure must be carried out in accordance with Annexes III to IX of Directive 2014/34/EU (ATEX Directive).</p> <p>However, the market surveillance authority may, upon duly justified request, authorise the placing on the market or putting into service of products for which no conformity assessment procedure has been carried out, provided that the use of such products is necessary in the interest of the protection of persons, domestic animals or property. This regulation only applies to the territory of the country concerned and not to components. The applications are usually submitted by (specialist) companies.</p>
Erforderliche Unterlagen	<p>Application content informal (in writing):</p> <ul style="list-style-type: none"> • Description and specification of the product incl. the planned deviation • if it concerns the placing on the market of individual equipment, protective systems or devices (custom-made products) or
