Teaser	If you wish to inspect, test, maintain or repair X-ray equipment or sources of interference on a commercial basis, you must notify the competent authority before commencing the activity.
Volltext	Do you intend to inspect, test, maintain or repair X-ray equipment or sources of interference on a commercial basis? In these cases, you must notify the competent authority in writing before starting the activity.  If the competent authority does not prohibit your
	planned activity, you may commence the activity. A prohibition may be issued if:
	<ul> <li>there are facts that give rise to concerns about the reliability of the person obliged to notify,</li> <li>required evidence is not or no longer fulfilled or</li> <li>there are facts that give rise to concerns as to whether the personnel required to carry out the activity are available.</li> </ul>
Erforderliche Unterlagen	<ul> <li>Written appointment of the radiation protection officer by the person responsible for radiation protection, stating the internal decision-making area.</li> <li>Proof of expertise (and updating if necessary) in radiation protection for the radiation protection officer</li> </ul>

Proof of expertise (and updating if necessary) in radiation protection for the radiation protection officer if no radiation protection officer is required. Proof of the necessary equipment and radiation protection measures taken, which are required according to the state of the art.  Voraussetzungen  The requirements are fulfilled if:  1\the radiation protection officer has been appointed in writing by the person responsible for radiation protection, stating the internal decision-making area of the radiation protection officer in the applicant's company.  2\text{\text{Proof of the radiation protection officer's or radiation protection supervisor's expertise in radiation protection by submitting a certificate of expertise (expertise group R5.1 / R5.2 or R6.1 / R6.2).  3\text{\text{\text{Proof of the available equipment and the measures required according to the state of the art to ensure compliance with the protection regulations.  4\there must be no other facts that give rise to concerns about the reliability of the person obliged to make the notification. Furthermore, there must be no facts that give rise to concerns about the safe execution of the activities due to a lack of necessary personnel.  Kosten  From EUR 100 up to EUR 1,000  Verfahrensablauf  Before commencing an activity (inspection, testing, maintenance, repair), all necessary certificates must be submitted to the competent authority.  You can submit the evidence to the competent authority by post together with the notification.  If the competent authority has no objections to the evidence you have submitted, you can start the activity.  Bearbeitungsdauer  2 - 4 Woche(n) 2 to 4 weeks  Frist  Before taking up/starting work	Modul	Sachverhalt
1\. the radiation protection officer has been appointed in writing by the person responsible for radiation protection, stating the internal decision-making area of the radiation protection officer in the applicant's company.  2\. proof of the radiation protection officer's or radiation protection by submitting a certificate of expertise (expertise group R5.1 / R5.2 or R6.1 / R6.2).  3\. proof of the available equipment and the measures required according to the state of the art to ensure compliance with the protection regulations.  4\. there must be no other facts that give rise to concerns about the reliability of the person obliged to make the notification.
