qualification, you must also meet other requirements for the granting of the permit. Further requirements are, for example, sufficient German language skills and health suitability.

You can also submit the application for the procedure from abroad.

You usually hand in these documents later. The competent office will inform you when to hand in the documents:

Sachverhalt

The competent body will then check whether you meet all the requirements. One important requirement is the equivalence of your professional qualification. The competent body compares your professional qualification from abroad with the German professional qualification as an orthoptist. The professional qualification is equivalent if there are no significant differences between your foreign professional qualification and the German professional qualification.

****Possible results of the examination****

If your professional qualification is equivalent, your foreign professional qualification will be recognised. The competent body can confirm the result to you in writing. You still have to fulfil the other requirements. Then you will receive the permission to use the professional title "Orthoptistin" or "Orthoptist".

Are there any essential differences between your professional qualification and the German professional qualification? Perhaps you can compensate for the differences through your professional practice, other knowledge or skills (lifelong learning). You have to prove the professional practice. Knowledge and skills must be certified by an authority of the state in which the knowledge or skills were acquired.

However, it may be that the essential differences cannot be compensated by this knowledge. In this case, your foreign professional qualification will not be recognised. You are then not allowed to work as an orthoptist in Germany.

However, the competent authority will tell you the essential differences and why you cannot compensate the essential differences by your professional practice.

In most cases you can make a compensatory measure. With this you can compensate for the essential differences.
