The prerequisite is that you comply with the necessary rules for operation, such as proof of competence or safety requirements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Modul

## Sachverhalt

### Operation in the "special" category

If you are unable to comply with the conditions of the "open" operating category, a UAS operation will be assigned to the categories requiring approval.

You must therefore obtain a permit before commencing flight operations in the "special" and "subject to approval" operating categories. Approvals for the category "subject to approval" are not yet possible, as the corresponding UAS and the legal requirements for operation are still under development.

You can check in advance which category your operation belongs to on the basis of your own risk assessment.

The German Federal Aviation Office provides a clear flow chart on its website to help you classify your operation. For example, if your aircraft has a take-off mass of more than 25 kilograms or is intended to drop objects, you will need an operating permit.

You should draw up a rough operating concept before operation. The following questions are relevant:

- Where should your UAS fly (ground and air area)?
- How high should it fly?
- How should it be flown? Within visual line of sight (VLOS – "Visual Line of Sight") or beyond visual line of sight (BVLOS - "Beyond Visual Line of Sight")?
- Which UAS do you want to fly with?

To obtain an operating license in the "special" category, please contact the aviation authority in your federal state.

If the local jurisdiction falls within one of the following federal states, the Luftfahrt-Bundesamt (LBA) will handle the application:

- Bavaria
- Berlin
- Brandenburg

## Hinweise

## Rechtsbehelf

## Kurztext

- Operating license for unmanned aerial vehicles Issuance
- The operation of unmanned aerial vehicles such as drones is divided into 3 categories "open" "special" "subject to approval"
- Grading and classification into the individual categories is based on the respective operational risk or the maximum possible personal injury "open" category means lowest operational risk: drone flight permitted without prior approval if legal requirements are met Drone flight with higher risk for bystanders or conditions of the "open" operating category not complied with: Operation falls into category "special" or "subject to approval" and is subject to authorization
- Prerequisites: Air liability insurance Proof of competence according to A2 or higher UAS operator number
- Required documents: Main application: Application for an operating license in the "special" category in accordance with Article 12 of Regulation (EU) 2019/947 Proof of air liability insurance Proof of competence according to A2 or higher Operations manual (ConOps) SORA risk assessment (SORA - Specific Operations Risk Assessment) Further documents if necessary
- Responsible: Aviation authority of the federal state in which the principal place of residence (natural person)
