Teaser	If you intend to make changes to an installation that requires a permit and generates electricity from renewable energy sources, you must apply for a permit from the relevant authority.
Volltext	<p>Do you operate a plant subject to immission control approval for which you already have immission control approval and plan to carry out repowering measures at this plant?</p> <p>Repowering measures serve to modernize a plant for the purpose of generating electricity from renewable energies.</p> <p>This repowering measure may cause adverse effects in relation to the current condition of the plant. Insofar as these are significant for the approval requirements of the plant requiring approval, a modification permit is</p>

Modul	Sachverhalt
	<p>required.</p> <p>For this reason, corresponding modifications to plants requiring approval must be reviewed by the immission control authority. For this purpose, you must submit an application for a modification permit and provide all the documents required for the assessment. The application can be made in writing or electronically.</p>
Erforderliche Unterlagen	<ul style="list-style-type: none"> • Required drawings, plans, expert opinions • explanations and • Other documents (if necessary, ask the competent authority).
Voraussetzungen	<p>The modification permit is issued if:</p> <ul style="list-style-type: none"> • it is ensured that the obligations resulting from the requirements of the Federal Immission Control Act and the Federal Immission Control Ordinance are fulfilled, and <ul style="list-style-type: none"> • other regulations under public law and occupational health and safety concerns do not conflict with the construction and operation of the plant. <p>A permit for wind turbines within the scope of repowering may also not be refused if, after the modernization, not all immission guide values of the technical instructions for protection against noise are complied with, but</p> <ul style="list-style-type: none"> • the immission contribution of the wind turbine after modernization is lower than the immission contribution of the wind turbines it replaces, and • the wind turbine corresponds to the state of the art.
