Sachverhalt

Voraussetzungen

Can be calibrated can only measuring instruments, if they meet the essential requirements of the Measurement and Verification Ordinance requirements. The measuring instrument must fulfill at least one of the following conditions fulfill:

- Type approval from the Physikalisch-Technische Bundesanstalt
- General approval for calibration or type examination certificate
- with EC type approval: Type approval of a European approval authority
- Conformity assessment according to national regulations, European Measuring Instruments Directive or according to European Weighing Instruments Directive (CE marking)

Kosten

The for the calibration of measuring instruments charged fees are regulated nationwide by the Ordinance on Fees on Metrology and Verification (Ordinance on Metrology and calibration fees ordinance - MessEGebV) regulated.

Verfahrensablauf

As user of measuring instruments must the calibration of your measuring device in writing or online. The calibration is usually carried out at the installation site of the meter. Depending on the type of measuring device the calibration can be carried out as part of a round trip. This means that the verification officer will visit you for verification without prior notification (e.g. for store scales) or an appointment will be arranged with you (e.g. for truck scales). truck scales). Measuring instruments for Electricity, gas, water or heat must be inspected by an officially recognized testing laboratory for verification. If the measuring device during the verification verification meets the requirements, an official marking for a further calibration period admissibility the use in commercial or official or official use as well as for measurements in public in the public interest.

Bearbeitungsdauer

When sending repair notifications, a period of 7 days is considered to be immediate. However, in the case of measuring devices for determining speed and
