Teaser	If you handle animal by-products as a company, you need an authorization.
Volltext	<p>All residues from animals that are not suitable or intended for human consumption are animal by-products.</p> <p>If you as a company handle animal by-products, you must recycle and safely dispose of them in such a way that they do not endanger human or animal health or the environment.</p> <p>Animal by-products are divided into 3 risk categories according to the degree of danger they pose to humans and animals.</p> <ul style="list-style-type: none"> <li>• Category 1 - High-risk material, for example:             <ul style="list-style-type: none"> <li>• Carcasses or parts of carcasses of animals suspected or affected by Transmissible Spongiform Encephalopathy (TSE),</li> <li>• animals that have been killed as part of TSE eradication measures, and</li> <li>• pets, zoo and circus animals</li> </ul> </li> <li>• Category 2 - medium risk material, for example:             <ul style="list-style-type: none"> <li>• Animals that died by means other than slaughter or killing for human consumption, including animals killed for disease control purposes,</li> <li>• fetuses, ova, embryos and semen not intended for breeding purposes and poultry dead in the egg shell (chicks)</li> </ul> </li> </ul>

## Modul

## Sachverhalt

- animal by-products containing residues of authorized substances or contaminants that exceed the limit values
  - Category 3 - low-risk material, for example:
    - Carcass parts and parts of animals slaughtered for human consumption when they have not been used for human consumption for economic reasons
    - Materials from aquatic animals, molluscs and crustaceans
    - Parts of live animals, such as
      - blood,
      - wool,
      - feathers,
      - hair and
      - raw milk

If you want to process animal by-products, you generally have to apply for a permit. This applies in particular to the following activities:

- Processing of animal by-products by
  - pressure sterilization,
  - by processing methods or
  - approved alternative methods
- disposal as waste by incineration of animal by-products and derived products, except in relation to plants or establishments holding an operating license
  - Disposal or recovery of animal by-products and derived products, if they are waste, by co-incineration, except in relation to plants or establishments holding an operating license
- Use of animal by-products and derived products as fuel
  - Production of pet food
  - Production of organic fertilizers and soil improvers
  - Conversion of animal by-products and/or derived products into biogas or compost in biogas plants and composting plants
  - Treatment of animal by-products after collection, in the form of activities such as
    - sorting,
    - cutting,
    - cooling,

## Sachverhalt

establishments handling animal by-products, such as processing plants, incineration and co-incineration plants, composting and biogas plants, pet food plants, fertilizer production plants, treatment plants for animal by-products after their collection, storage plants for animal by-products and their derived products require a permit for this activity.

- are divided into 3 categories:
  - Category 1: High risk material, for example:
    - Carcasses or parts of carcasses of Transmissible Spongiform Encephalopathy (TSE) suspected or affected animals,
    - animals that have been killed as part of TSE eradication measures, and
    - pets, zoo and circus animals
  - Category 2: Material with medium risk, for example:
    - Animals that have died by means other than slaughter or killing for human consumption, including animals killed for disease control purposes,
      - fetuses, ova, embryos and semen not intended for breeding purposes and poultry lying dead in the egg shell (chicks)
    - animal by-products containing residues of authorized substances or contaminants that exceed the limit values
  - Category 3: Low-risk material, for example:
    - Carcass parts and parts of animals fit for human consumption if they are not used for human consumption for economic reasons
      - Materials from aquatic animals, molluscs and crustaceans
    - Parts of live animals such as blood, wool, feathers, hair and raw milk
- The following activities are subject to authorization:
  - Processing of animal by-products by
    - pressure sterilization,
    - by processing methods or
    - approved alternative methods
  - disposal as waste by incineration of animal by-products and derived products, except in relation to plants or establishments holding an operating license
    - Disposal or recovery of animal by-products and derived products, if they are waste, by co-incineration, except in relation to plants or establishments holding
