Sachverhalt

distribution of renewably produced heat.

- Investments by entrepreneurs in the agricultural and food sector, including farmers, in the production, storage and distribution of renewable energies. This includes corresponding investments by companies in which at least 50 percent of the shares are held by the aforementioned entrepreneurs.
- Investments in photovoltaic installations on buildings used for agricultural purposes or formerly used for agricultural purposes.
- Investments by hydropower plant operators in migration aids for fish (fish ladders).

Funding is provided under the LR base conditions (No. 256):

- Investments in "citizens' and farmers' wind farms". These are companies in which the majority of shares are held by local citizens, businesses and landowners. The shares in the company are typically distributed through a regionally open participation procedure that enables local citizens and land owners to acquire capital shares in the wind farm.

Conditions

The above-mentioned investments must serve to set up a new establishment, expand an existing establishment, diversify the production of an establishment into new, additional products or fundamentally change the entire production process of an existing establishment.

Type of support Low-interest loan

Amount up to EUR 10 million per final borrower and year. The maximum permissible loan amount per borrower may be limited by EU regulations.

Financing share up to 100 % of the eligible investment amount

Disbursement 100 %

Term 4 to 30 years
