farming method and the place of production. Only direct marketers who sell eggs directly to the end consumer are exempt from this regulation.

The basis for this regulation is Directive 1999/74/EC (minimum standards for the protection of laying hens). It stipulates that all establishments covered by this directive must be registered with a number that enables the traceability of eggs placed on the market for human consumption.

This requirement is implemented by Directive 2002/4/EC on the registration of establishments keeping laying hens. It prescribes the data to be registered, the code for the farming method and the code for the individual member states throughout the EU.
