Teaser	Companies that install, maintain, service, repair or decommission stationary refrigeration/air conditioning systems and heat pumps containing fluorinated greenhouse gases as well as fire protection systems must be able to present a company certificate issued by the competent authority.
Volltext	<p>#### Certification in accordance with Section 6 (1) of the Chemicals Climate Protection Ordinance (ChemKlimaschutzV)</p> <p>Companies that install, maintain, service, repair or decommission stationary refrigeration/air conditioning systems and heat pumps containing fluorinated greenhouse gases as well as fire protection systems must be able to present a company certificate issued</p>

Modul

Sachverhalt

by the competent authority.

The company certification certificate must contain at least the following information

- Name and registered office of the company
- Description of the site and the certified activities in relation to the site and its facilities
- Issue number and expiry date, if applicable
- Name of the certification body, date of issue and signature of the person authorised to issue the certificate

****Notes:****

- Regulation (EU) 2024/573 (new F-Gas Regulation) entered into force on March 11, 2024. This replaces Regulation (EU) 517/2014. The new F-Gas Regulation and its implementing regulations extend the activities requiring certification.
- On September 29, 2024, the Implementing Regulation (EU) 2024/2215 came into force, which regulates the minimum requirements for certification in relation to activities on stationary refrigeration systems, air conditioning systems and heat pumps, organic Rankine circuits and refrigeration systems in refrigerated trucks, refrigerated trailers, light refrigerated vehicles, intermodal containers and railroad wagons. The Implementing Regulation replaces Implementing Regulation (EU) 2067/2015.
