Teaser	If you work in the technical field of radiation protection (e.g. operating X-ray equipment or handling radioactive substances), you must have the necessary specialist knowledge. This must be checked and certified by the competent authority.
Volltext	If you intend to operate X-ray equipment or handle radioactive materials, a certificate of competence from the competent authority is required. To do this, you must first successfully complete a recognized course to acquire specialist knowledge. You then apply to the competent authority for a certificate of professional competence. The authority will then examine your documents and the requirements and, if the examination is positive, will certify your specialist knowledge. It should also be noted that you must update your specialist knowledge after five years at the latest.
Erforderliche Unterlagen	• Proof of suitable training for the respective area of application • Proof of practical experience (certificate of competence) • Proof of successful participation in recognized courses (must not date back more than five years).
Voraussetzungen	• You must have successfully completed a course to acquire the required specialist knowledge • You must be able to provide written or digital proof of the required practical experience • You must have suitable training for the respective field of application
Kosten	Gebühr: 200€ - 1.000€
