Teaser	If you suspect that a communicable disease exists in your community facility, you must report it.
Volltext	As the management of a community facility such as • day care centers and nurseries, • Child day care requiring a license, • schools and other educational institutions, • homes and • vacation camps are obliged to notify the competent authority immediately if there is a suspicion that persons working or being cared for in the facility have contracted a communicable infection. This includes the following diseases: • Cholera • diphtheria • Enteritis caused by enterohaemorrhagic E. coli (EHEC) • viral hemorrhagic fever • Haemophilus influenzae type b meningitis • Impetigo contagiosa (contagious bark lichen)

Modul
Sachverhalt

- whooping cough
- contagious pulmonary tuberculosis
- measles
- meningococcal infection
- mumps
- diseases caused by orthopox viruses
- paratyphoid fever
- plague
- poliomyelitis
- rubella
- Scarlet fever or other Streptococcus pyogenes infections
- shigellosis
- Scabies (scabies)
- Typhus abdominalis
- Viral hepatitis A or E
- chickenpox
- Lice infestation.

Affected employees may not carry out any teaching, educational, care, supervisory or other activities in which they have contact with the people cared for there until, in the opinion of a doctor, there is no longer any risk of them spreading the disease or lice.

This also applies to cared-for persons who are not allowed to enter the rooms used for the operation of the communal facility, use the facilities of the communal facility or participate in events at the communal facility until the medical opinion has been obtained.

Erforderliche Unterlagen

In the case of head lice:

- Parents' declaration of proper treatment.
- In the case of a single infestation, confirmation of proper treatment is sufficient for re-admission.

Voraussetzungen

There is a suspicion that one of the following diseases is present in a person working or being cared for:

- Cholera
- Diphtheria

Modul

Sachverhalt
