Volltext	Temporary structures are structures that are suitable and intended to be repeatedly erected and dismantled at different locations (e.g. fairground rides, tents, etc.). A so-called construction permit is required for the erection and use of temporary structures. Without prejudice to other regulations, temporary structures that require a building permit may only be put into use if the building supervisory authority at the installation site has been notified of their installation and the inspection book has been submitted and the temporary structures have been approved by the authority (acceptance for use).
