Volltext	<p>The profession of food chemist is regulated in Germany. This means that you must have a certain qualification in order to be allowed to work in the profession. If you have a foreign professional qualification as a food chemist, you can work in this profession in your chosen federal state under certain conditions. To do this, you must submit an application with all the necessary documents to the relevant state authority.</p> <p>In the recognition procedure, the competent state authority compares your professional qualification from abroad with the professional qualification in the selected federal state and makes an equivalence assessment. You will receive feedback after your application has been reviewed.</p> <p>If your professional qualification is equivalent and you meet all other requirements, you may use the professional title "food chemist". If you lack the professional qualifications required for recognition, the notification will state the main differences. You can</p>
