| <b>Teaser</b>                        | If you wish to withdraw or discharge water from surface waters, you can apply for a water permit from the relevant water authority.   |
| <b>Volltext</b>                      | If you want to extract water from an above-ground body of water - i.e. from a river, lake, canal, stream, ditch or pond - you need a permit or authorization under water law. A permit is normally applied for. In  |

## Modul

### Sachverhalt

justified exceptional cases, you can also apply for a permit instead.

A permit grants you the right to use surface waters. Unlike a permit, an authorization cannot be revoked by the authorities at any time, but only to a limited extent. In addition, a permit protects you from third-party claims under civil law.

The permit specifies the purpose, type and extent of use. It may be linked to conditions and ancillary provisions.

## Erforderliche Unterlagen

In your application for a permit, please provide the following information, among others:

- Reasons why a secure legal status is necessary for your project
- Explanation of the purpose and plan of your project

The documents you need for your application will vary depending on the type and scope of your project. In a preliminary discussion with the responsible water authority, you can clarify which documents are required in your case.

As a rule, several or all of the following documents are required:

- Project description with hydraulic calculation of the extraction quantities and description of the extraction systems (e.g. pump system and transport system)
- Site plan of the extraction point(s) and, if applicable, discharge point(s)
- Information on the purpose and duration of the water withdrawal

Optional:

- Hydrological report (effects of the water abstraction)
- Proof of maintenance of the minimum water flow
- Documents for the preliminary EIA assessment
- Technical contribution according to WFD
- Statement from the person responsible for maintenance/water and soil association for the
