advance in the case of ship fumigation. The competent authority may allow exceptions to this notification period in justified cases.

A 24-hour notification period is sufficient for fumigation of transport units staged for export at a rail terminal or other handling facility. Transportation units are vehicles, rail cars, containers, tanks, or other shipping containers in which fumigation occurs.

A fumigation supervisor and another expert/deputy fumigation supervisor must be appointed to carry out the fumigation. According to Annex I No. 4.4 GefStoffV, persons are considered to have expert knowledge if they can prove through training and examination that they are sufficiently qualified to carry out fumigation safely. Proof of this expertise is provided by successful participation in an officially recognized training course in accordance with Annexes 1a - c of TRGS 512.

The notification to the competent authority requires updating in case of

- every change of the fumigation supervisor,
- changes in the fumigation process and in the fumigation system that require a revision of the risk assessment, and/or
- as soon as a different fumigant is used.

Erforderliche Unterlagen

The notification must contain the following documents:

- a current official site plan on a scale of 1:1000 showing the location of the fumigation and the object to be fumigated with details of the goods to be fumigated
- a measurement plan with planned measurement points and time intervals at which measurements are to be taken

Voraussetzungen

Fumigations must be carried out in such a way that persons are not endangered. The personnel and safety requirements specified in TRGS 512 "Fumigation" must be met.

A responsible competent person must be appointed
