Sachverhalt

- Specialist agronomist for organic farming

as well as for the following school qualifications

- State-certified economist specializing in agriculture or horticulture or gardening and landscaping
- State-certified agricultural business economist specializing in agriculture

you can have your foreign qualification recognized.

In the area of agricultural training professions (non-regulated professions), the recognition notices - unlike in the area of regulated professions - are not a prerequisite for permission to practice the profession, but primarily a "transparency instrument". A certificate of recognition makes it easier for employers to assess foreign qualifications and thus improves the labor market opportunities of those qualified abroad."

Verfahrensablauf

For recognition, the **competent body** will check, on the basis of an informal signed application and your enclosed certificates, whether or to what extent your foreign qualification corresponds to a German qualification for the profession you intend to practise. This assessment is based on defined formal criteria, such as the content and duration of the training. Your proven relevant professional experience is also taken into account, as are other relevant qualifications. As soon as your application documents are complete, the competent body will carry out the examination and may request further documents. You will receive written notification of the result of the examination. This will also contain information on which qualifications you may lack for full recognition and how you can make up for this.

Before submitting your application, ask the staff at the Thuringian State Office for Agriculture and Rural Areas (TLLLR) before you apply. The consultations are free of charge and confidential.
