requirements of the General Administrative Regulation to the 10th BImSchV so that both winter and summer goods can be tested. Sampling and analysis is carried out by testing laboratories accredited for this purpose (mineral oil products).

The results are recorded in accordance with Section 18 (3) of the 10th BImSchV using the "FQMS - Fuel Quality Monitoring System". This is a data collection tool of the Federal Environment Agency (UBA).

The results of the country reviews are compiled annually by the UBA into a National Fuel Report. This is reported by Germany to the European Commission.
