Teaser	Under certain conditions, you can have aggregates for road construction included in the list of quality-monitored aggregates and building material mixtures in the Thuringian Road Construction Administration.
Volltext	As a manufacturer of aggregates - natural, RC building materials and industrially produced by-products - you can have these included in the list of quality-monitored aggregates and building material mixtures under certain conditions. By publishing you as a manufacturer in the Thuringia list, users, for example other building authorities and construction companies, can see which building materials are suitable for which application of the corresponding manufacturer.
Erforderliche Unterlagen	• Layers without binders: third-party inspection certificates, lists of grades, environmental compatibility • Aggregates: Test reports from voluntary quality monitoring, declarations of performance, alkali product certificate, environmental compatibility

Modul	Sachverhalt
Voraussetzungen	• You are a manufacturer of layers without binders and/or aggregates (natural building materials, RC building materials, industrially produced by-products) • You want to deliver to the supervisory area of the Thuringian Road Construction Administration. • You carry out continuous quality monitoring of your products.
Kosten	free of charge
Verfahrensablauf	• As a manufacturer or authorized inspection body, submit the application for issuing the suitability assessment and inclusion in the list via an online portal. • In this online portal, you upload all the documents required for the respective test run, which are necessary for processing the application or make a statement about the validity of the documents, for example about the up-to-dateness of the declarations of performance. • Only when you have submitted your documents in full will the responsible body process your application and include it in the list.
Bearbeitungsdauer	Processing usually takes 2 to 4 weeks, provided all documents are available.
Frist	The period of validity depends on the expiry of the specified validity.
