Sachverhalt

Mining Act. These include energy resources such as hard coal and lignite or crude oil and natural gas, but also metals, salts, geothermal energy and lithium.

Erforderliche Unterlagen

You can clarify which documents are required in your case together with your responsible mining authority. The following documents are generally required:

- Information about the applicant company
 - General overview of the company and the planned project,
 - general information on the expected development of the operation, expected objective,
 - proof of ownership of the land on which the mineral resources are to be explored or extracted, or
 - the authorization to explore and extract non-mining mineral resources, i.e:
 - a permit for exploration or
 - a permit for the extraction of a non-mining mineral resource
 - proof of permission under water law, if applicable,
 - Full description of the site situation with distance to protected areas and existing infrastructure
 - Geological reports
 - Hydrogeological reports
 - Nature conservation contributions
 - Technical concept for operational management, e.g. planned boreholes (start/finish coordinates, ownership structure)
 - Technical descriptions of the equipment required, including for drilling, machinery and processing
 - Information on operational safety (from shut-off to time records) and operational monitoring
 - Proof of proper waste disposal and access routes (fulfillment of all relevant requirements)
 - Description and assessment of possible impacts on the environment and planned measures to avoid and reduce them, nature conservation contributions, noise reports
 - Water management measures
 - Measures to provide for the reutilization of the surface
 - Measures for immission control
 - Description of the operating facilities, such as offices and social rooms, parking spaces, storage areas,

Modul

Sachverhalt

- workshops, filling stations
- Details of responsible persons
 - Certificate of guarantee, if applicable

Voraussetzungen

Certain requirements must be met before you can obtain approval for your main operating plan:

- Your project must not conflict with any overriding public interests.
- You must be able to prove that you have the officially issued authorization for the exploration or extraction of non-mining mineral resources or the rights over natural mineral resources.
- You must be able to prove that your company and your managerial staff or representatives have the necessary reliability and also the necessary expertise and physical fitness.
- You must take all necessary safety measures to prevent risks to the life and health of employees and third parties in the company. These measures must also ensure the protection of material assets.
- Your work must not impair other mineral resources whose protection is in the public interest.
- The earth's surface must be protected in the interests of personal safety and public traffic.
- The waste produced must be properly reused or disposed of.
- You must take precautions to ensure that
 - the surfaces can subsequently be made usable again to the extent required by the circumstances,
 - the safety of other mining operations is not jeopardized,
 - the exploration or extraction of mineral resources does not result in any harmful consequences for the general public and in the case of mining operations in the area of the continental shelf or coastal waters:
 - shipping facilities and signs are not impaired and
 - shipping and shipping lanes, airspace, fishing and flora and fauna are not unreasonably impaired
 - underwater cables and pipelines as well as oceanographic or other scientific research are not impaired more than is unavoidable under the circumstances and
 - the damaging effects on the sea are kept to a minimum

Modul	Sachverhalt
	<ul style="list-style-type: none"> • You may have to provide the competent authority with proof of a security deposit with an appropriate sum insured, a bank guarantee, letter of comfort or similar, which covers the above-mentioned risks.
Kosten	<p>Fees are charged for the service.</p> <p>The fees are based on the applicable administrative cost regulations (ThürVwKostOMUEN).</p>
Verfahrensablauf	<p>You can apply for approval of your main operating plan online via the "BergPass" platform or directly to your competent mining authority.</p> <p>Apply for approval online:</p> <ul style="list-style-type: none"> • Go to the "BergPass" online platform and log in. • To apply, you will need a BundID and an identity card or residence permit with an active online ID function. • Upload the required documents as a file. <p>Apply directly to the responsible mining authority for approval:</p> <ul style="list-style-type: none"> • You must prepare your main operating plan in such a way that both the approval requirements and other concerns such as groundwater and nature conservation are comprehensively described. For complex projects, it is advisable to contact your competent authority and coordinate the required application documents. • Submit the application and all required documents to the competent authority <p>Further procedural steps:</p> <ul style="list-style-type: none"> • The competent authority will check your application and the documents submitted for completeness. If any documents are missing, the authority will contact you. • The mining authority decides on the approval.

Modul	Sachverhalt
	<ul style="list-style-type: none"> • You will receive a notification electronically and by post informing you of the decision on your application. • The approval may contain ancillary provisions (requirements, conditions, time limits), which you must comply with accordingly and which will be reviewed by the mining authority. <p>You will also receive a notice of costs. Pay the fees.</p>
Bearbeitungsdauer	
Frist	<p>1 Monat(e)</p> <p>You may only start your planned mining work once you have received approval for your main operating plan. As a rule, operating plans are approved for a limited period of time. If long-term planning is not possible, it may be necessary to submit a new main operating plan at short intervals, for example every 2 years. The main operating plan can be drawn up for a period of up to 8 years. Depending on the individual case, approval is initially granted for up to 4 years. Further extensions must be applied for separately in good time.</p>

Hinweise	<p>**Term of the main operating plan**</p> <p>The period described in your main operating plan usually covers several years. The responsible mining authority decides on the duration on a case-by-case basis. An important criterion here is the foreseeability of the operating plan. In practice, the term can be extended by a few years without a new main operating plan having to be drawn up and comprehensively reviewed in a mining law procedure.</p> <p>If you interrupt your operations for up to 2 years, you can legally continue to operate during this time. Only if the interruption lasts longer than 2 years do you have to obtain a permit from the competent authority.</p> <p>**Exceptions and special features**</p>

Modul

Sachverhalt

You are exempt from the operating plan obligation if you want to explore an area as an exploration company and in doing so

- are not planning to deepen the surface,
- do not use mechanical power,
- do not carry out any work underground and
- do not use explosive substances or explosive substances intended for blasting.

If your operation is of low hazard or significance, you can be exempted from the obligation to plan operations if

- the protection of your employees and third parties and
- the reutilization of the surface is ensured, and
- your project is not located on the continental shelf.

If you wish to explore, extract and process mineral resources together with other companies, the competent authority may require you to draw up a joint operating plan.

In the case of projects that may have a significant impact on the population, you should inform the public concerned at an early stage, i.e. before submitting an application. In this way, public opinion can be incorporated into the company's planning before the plans are finalized.

Rechtsbehelf

- Objection: Please refer to your notification for information on how to lodge an objection.
- Administrative court action

Kurztext

- Mining operating plan procedure Main operating plan approval
 - Required for entrepreneurs: Approved main operating plan for exploration, extraction or processing operations.
 - Operating plan: Essential for operational monitoring.
