Teaser	If you are affected by a floodplain designation procedure, you can submit comments and objections.
Volltext	The designation of the floodplain covers all areas which, due to their location, are statistically inundated once every hundred years by flooding of the corresponding watercourse. A floodplain is determined on the basis of a technical calculation after all comments and objections received have been examined. The hydraulic calculation takes into account the expected flood discharge, the terrain and other influencing factors. Various protective regulations and prohibitions apply in a floodplain. You have the opportunity to submit your comments, concerns and questions within the procedure for determining the floodplain.

Sachverhalt

the following draft documents will be made available in the towns, municipalities and administrative communities concerned:

- Texts of the ordinance
- Parcel-specific maps in A1 format

You will be informed of the opening times and locations in good time in the relevant official gazette or by means of a public notice.

It is also possible to view the documents on the homepage of the Thuringian State Office for the Environment, Mining and Nature Conservation. The corresponding link will be published in the announcement text.

After viewing the documents, you have the opportunity to submit your comments and objections in writing, verbally for the record or online.

If you would like to submit your objection online, please use the input option provided. Please answer all the necessary questions carefully so that your comments can be assigned to the correct location, for example. Uploading additional documents, for example photos of actual flood events, may facilitate or underline your textual comments.

Bearbeitungsdauer

The review of all comments and objections received may take some time. A specific time period cannot be specified. You will receive confirmation of receipt. If necessary, the responsible authority will contact you with further questions.

Frist

You can raise objections up to one month after the end of the exhibition.

Modul

Sachverhalt

Kurztext

- Determination of a floodplain Participation
- Submitting information and objections in connection with the designation of a floodplain
- The floodplain is determined on the basis of current calculations for a flood event that is statistically expected to occur once every 100 years
- Comments and objections can be submitted in writing, for recording or online
- If photos / videos of previous flood events are available, these can also be submitted to enable a more precise determination of the floodplain
- Responsible in Thuringia: Thuringian State Office for the Environment, Mining and Nature Conservation

Ansprechpunkt

Please contact the Thuringian State Office for the Environment, Mining and Nature Conservation - Department 41 Hydrological State Service, Flood Information Center.
