Fachlich freigegeben durch	Thuringian State Office for the Environment, Mining and Nature Conservation
Handlungsgrundlage	<a href="https://www.gesetze-im-internet.de/bimschg/__23a.html">https://www.gesetze-im-internet.de/bimschg/__23a.html</a> <a href="https://www.gesetze-im-internet.de/bimschg/__23a.html">https://www.gesetze-im-internet.de/bimschg/__23a.html</a>
Teaser	If you are planning an incident-relevant construction and operation or an incident-relevant change to an installation that does not require a permit and is an operating area or part of an operating area, you must register this.
Volltext	Do you operate an installation that does not require a permit under immission control legislation, which is an operating area or part of an operating area and are planning an incident-relevant change to it? Or are you planning the construction and operation of an installation that does not require a permit and is an operating area or part of an operating area? These projects can lead to a significant increase in risk from the installation as a result of the construction or modification or other immission law requirements can no longer be guaranteed. The immission control authorities must therefore be informed of these changes so that the requirements under immission law can be checked. To do this, you must register your project with the responsible authority before it is carried out. The notification can be made in writing or electronically.

## Modul

## Sachverhalt

### Erforderliche Unterlagen

- Drawings, plans, explanations of the installation
- Presentation of the appropriate safety distance, if necessary for the determination an expert opinion on the effects that can be caused by the installation in the event of serious accidents
- other documents (if necessary, ask the competent authority).

### Voraussetzungen

The construction, operation or modification of an installation relevant to an incident must be notified to the competent authority if:

- The installation is not subject to licensing and is either an operating area or part of an operating area,
- an incident-relevant construction and operation or incident-relevant modification is planned and
- an application has not already been made for a permit for the construction and operation of an installation that is relevant to an incident or for the modification of an installation that does not require a permit.

An incident-relevant approval procedure for an installation not requiring approval is required and must be applied for if:

- The appropriate safety distance of the installation is undercut for the first time,
- the distance is further reduced or
- a significant increase in risk is triggered.

### Kosten

### Verfahrensablauf

- You notify the competent authority of the accident-relevant construction or modification of the installation that does not require a permit before commissioning or implementing your project.
- You can do this using the EliA service or in writing. You enclose the necessary documents with the notification.
- The competent authority will confirm receipt of the notification and the enclosed documents. If necessary, the authority will request further and/or additional documents.
- No later than two months after receipt of the
