| Teaser | For buildings in redevelopment areas and urban development areas, you can apply for a certificate of modernization and repair measures carried out to preserve this building and their costs. |
| Volltext | <p>For the preservation of buildings in redevelopment areas and urban development areas, you can claim tax benefits in connection with the income tax return in particular.</p> <p>To do this, you will need, among other things, a special certificate, which you can apply for as the owner or as the owner's authorized representative/representative at the responsible certifying authority.</p> <p>You can present the certificate as proof when applying for the tax benefit at the responsible tax office. In addition to the certificate, the tax office will check other tax requirements that must also be met in order for you to receive the tax benefits.</p> |

Modul

Sachverhalt

Erforderliche Unterlagen

- In case of representation: copy of power of attorney or proof of authority to represent,
- Plans inventory,
- Plans with entry of the measures,
- Justification of the obligation to carry out the measure, for example by means of a modernization or repair order or a written modernization and repair agreement with the municipality,
- Original invoices (final invoices; partial invoices and cost estimates do not replace a final invoice),
- Receipt slips (must clearly show quantity, item and price).

The certifying authority shall make the invoices available again to the owners of the buildings after checking and, if necessary, correcting them.

Voraussetzungen

You will only receive the certificate for modernization and repair measures on a building that is located in a formally defined redevelopment area or urban development area. Only those measures are eligible for certification to which the owner has committed himself before the start of the measure by:

- a modernization or repair requirement or
- a written agreement with the municipality.

Measures include:

- Modernization and repair measures,
- other measures on buildings that are to be preserved because of their historical, artistic or urban development significance,
- Measures for the reconstruction of a building with the reuse of the old components as far as possible as a rehabilitation measure, if this reconstruction makes sense for structural, safety or economic reasons.

The following, among others, are not eligible for certification:

- The demolition and new construction of buildings, such as the reconstruction of a building according to a historical model after demolition or the reconstruction of a destroyed building or part of a building (for example, in a construction gap),
- costs for the installation of photovoltaic systems.

Kosten

The use of this administrative service is subject to a fee. The fees incurred are not part of the certifiable expenses. The fees incurred are deductible as

Modul
Sachverhalt

income-related expenses or business expenses if the building is used to generate income.

Verfahrensablauf

You can apply for the certificate in writing as the owner of a building or as the authorized representative of the owner. Since the certificate is issued on a property-by-property basis, you must always apply for an individual certificate for parts of the building that are independent immovable assets (e.g. underground parking), as well as for condominiums and partially owned rooms. In the case of developer or purchaser models and residential and part-ownership communities, you can instead apply for an overall certificate including the allocation to the individual parts of the building. For this, you need the effective powers of attorney of the purchasers.

The responsible certification authority then checks,

- Whether the building is located in a formally defined redevelopment area or urban development area,
- whether modernization and repair measures or other measures that serve the preservation, renewal and functional use of a building that is to be preserved due to its historical, artistic or urban development significance have been carried out,
- the amount of the costs incurred for the certifiable measures, and
- whether and to what extent subsidies from public funds have been granted by an authority responsible for redevelopment areas or urban development areas or will be granted after the certificate has been issued.

In order to give you clarity about the content of the expected certificate at an early stage, the certifying authority can already provide you with a written assurance about the expected certificate. However, the assurance does not replace the certificate. Therefore, it is not suitable as evidence when applying for tax benefits at the tax office.

Bearbeitungsdauer
Frist
weiterführende Informationen
Hinweise

If you are unable to submit the final invoices due to the

Modul
Sachverhalt

insolvency of the developer, you must

- prove the insolvency of the developer and
- provide evidence of the eligible expenses/costs individually by trade in the form of an expert opinion by a building surveyor to be submitted by the purchaser.

The purchase price paid to the developer is the upper limit of the certifiable expenses. Lump-sum invoices from tradesmen can only be taken into account if the original quotation on which the lump-sum contract is based is attached. If necessary to verify individual services, the responsible certifying authority may require submission of the original cost estimate. Approval and inspection fees are part of the costs of the approved or inspected construction measure.

Rechtsbehelf

You can lodge an appeal against the decision.

Kurztext
Ansprechpunkt
Zuständige Stelle

The responsible certifying authority is the city or municipality in which the building is located.
