Modul	Sachverhalt
Leistungsschlüssel	99090008202000, 99090008202000
Leistungsbezeichnung I	Biotope protection
Leistungsbezeichnung II	
Typisierung	4 - Land: Regelung
Quellredaktion	Thüringen
Freigabestatus Katalog	unbestimmter Freigabestatus
Freigabestatus Bibliothek	unbestimmter Freigabestatus
Begriffe im Kontext	
Leistungstyp	Leistungsobjekt mit Verrichtung
Leistungsgruppierung	Naturschutz (090)
Verrichtungskennung	Schutz (202)
SDG-Informationsbereich	
Lagen Portalverbund	Tier-, Pflanzen- und Naturschutz (2130200)
Einheitlicher Ansprechpartner	Nein
Fachlich freigegeben am	19.05.2020

Modul	Sachverhalt
Fachlich freigegeben durch	Thuringian State Office for the Environment, Mining and Nature Conservation

Teaser	Here you will find information on biotope protection.
Volltext	A biotope is a more or less homogeneous part of the landscape that can be delimited from its surroundings. The definition and delimitation of a biotope is usually based on its plant and/or geomorphological characteristics and its current use. A typical example is a pond. By means of its shoreline and the aquatic plants growing in it, it can be relatively clearly demarcated from its surroundings. Just like some plant and animal species, certain biotope types are disappearing more and more from our landscape. According to § 30 of the Federal Nature Conservation Act in conjunction with § 15 of the Thuringian Nature Conservation Act, certain parts of nature and landscape that are of particular importance as biotopes are protected by law. Unlike the more well-known nature conservation areas or national parks, no designation is required for statutory biotope protection to be effective. These biotopes are protected by law simply because they belong to a certain biotope type. Actions that could lead to the destruction or other significant impairment of such protected biotopes are prohibited.

Kurztext	Information on biotope protection can be obtained from the responsible lower nature conservation authority.
Ansprechpunkt	You can find out whether a biotope is subject to the protection of the law from the lower nature conservation authority of the district or independent city. Information on this can be found in the map service of the Thuringian State Office for the Environment, Mining and Nature Conservation (TLUBN). There are extensive nature conservation funding programs for the use or maintenance of these biotopes in line with nature conservation requirements. Information on these can be obtained from the relevant lower nature conservation authority.
