We refer to the FAQ of the federal government on the aid and are happy to answer any questions.</p>
Teaser	Following the introduction of the gas price brake for gas and district heating customers, private households that heat with energy sources such as heating oil or wood pellets can also benefit.
Volltext	<p>Due to the sharp rise in additional costs for non-grid-connected energy sources, the federal government has made funding of up to 1.8 billion euros available, which will be distributed among the federal states according to a distribution formula. Applications are submitted and processed via the federal states or their approval office using an online platform.</p> <p>The hardship grants are available to private households in the Federal Republic of Germany that use non-pipeline-based energy sources for heating. The hardship aid is intended to cushion the additional costs for these energy sources in 2022 that exceed a doubling of the price level from 2021. It is therefore not a question of doubling the individual procurement costs, but of doubling them compared to the average value for 2021, the so-called reference price. The following reference prices were determined by the federal government for the whole of Germany</p> <ul style="list-style-type: none"> • Heating oil: 71 ct/l (incl. VAT) • Liquid gas: 57 ct/l (incl. VAT) • Wood pellets: 24 ct/kg (incl. VAT) • Wood chips: 11 ct/kg (incl. VAT)

Modul

Sachverhalt

- Wood briquettes: 28 ct/kg (incl. VAT)
- Logs: 85 Euro/meter (incl. VAT)
- Coal/coke: 36 ct/kg (incl. VAT)

Of the costs that exceed a doubling of the costs compared to 2021, affected private households will be reimbursed 80% for the respective energy source, provided the amount is more than 100 euros and does not exceed 2,000 euros.

The subsidy amount is calculated using the following formula $\text{Subsidy} = 0.8 \times (\text{invoice amount 2022} - 2 \times (\text{reference price} \times \text{order quantity}))$. Relief is available to households living in their own property, as well as tenants. The property must be heated by a heating system that does not use grid-bound energy sources.

Invoices from private households from the period from January 1, 2022 to December 1, 2022 can be taken into account when applying for hardship assistance. The delivery date is decisive in determining whether the costs were incurred during the relief period.

Operators of a fireplace (heating system) are eligible to apply. The application for hardship assistance for private households must be submitted by the person who operates the heating system in a residential building and purchases the energy source. If the fireplace is operated by a private household, a person from the private household may submit an application as the direct applicant.

If fireplaces for heating private households are operated centrally by a landlord, a landlady or a condominium association (WEG), they are eligible to apply as central applicants. A declaration must be made that the funding received will be passed on to the tenants.

As a tenant, you do not have to take action yourself unless you have ordered and paid for fuel yourself.

Erforderliche Unterlagen

- Fuel invoice(s) from the period 01.01.2022 up to and including 01.12.2022
- Proof of payment proving payment of the fuel (e.g.

Modul	Sachverhalt
	<p>bank statement)</p> <ul style="list-style-type: none"> • Proof of identity • Fireplace certificate
Voraussetzungen	<ul style="list-style-type: none"> • You are the owner or tenant of a property with a non-piped fireplace and purchased heating oil, LPG, wood pellets, wood chips, wood briquettes, logs and/or coal/coke between 01.01. and 01.12.2022 and paid more than twice the reference price. • The de minimis limit is 100 euros, which you must at least reach in order to receive a relief payment. The maximum total relief amount is 2,000 euros per household.
Kosten	None
Verfahrensablauf	<ul style="list-style-type: none"> • Submit your application online via the application platform directly in the federal state in which the fireplace is located. • If you do not have internet access or are unable to submit an application via the online platform for other reasons, you can ask another person to assist you with the application. This person can submit an application on your behalf. • In exceptional cases, the granting authorities of the federal states may also accept written applications. Please contact your local grant office. • After you have submitted an application, the granting office will check your application and, if approved, will arrange for payment.
Bearbeitungsdauer	Depending on the actual volume of applications, a processing time of several weeks is expected.
Frist	You can apply for hardship assistance until 20.10.2023. Please note that a total of up to 1.8 billion euros is available for hardship assistance. If the available funds are exhausted, hardship assistance can no longer be approved and paid out.

 much fuel assistance you would receive.

Hinweise

The administrative agreement between the Federal
 Ministry of Economics and Climate Protection (BMWK)
 and the federal states has not been published. For
 further information, please refer to the FAQs on
 "Hardship aid for private households due to sharp
 increases in energy costs for non-pipeline energy
 sources" on the BMWK website.

Rechtsbehelf

You will find information on the legal remedy in your
 notification.

Kurztext

- Hardship aid for private households for
 non-grid-connected energy sources
- Relief period from January 1, 2022 to December 1,
 2022.
- A doubling of the 2021 price level for
 non-pipeline-based energy sources must be borne by
 the household.
- In addition, reimbursement of 80% of the additional
 costs.
- At least 100 euros and up to 2,000 euros subsidy per
 private household.
- Applications and payments are made via a digital
 application procedure of the respective state.
- Private households that operate a fireplace and meet
