Modul	Sachverhalt
Fachlich freigegeben durch	Bayerisches Staatsministerium für Wohnen, Bau und Verkehr (Bavarian State Ministry of Housing, Building and Transport)
Handlungsgrundlage	https://www.gesetze-bayern.de/Content/Document/BayVV_2330_B_14207/True https://www.gesetze-bayern.de/Content/Document/BayVV_2330_B_14207/True
Teaser	The Free State of Bavaria promotes the amount of carbon dioxide sequestered for the construction, extension and addition of storeys to multi-storey residential buildings and buildings for the purposes of local authorities using timber construction.
Volltext	<p>Purpose</p> <p>The aim of the funding is to conserve finite resources by increasing the use of building elements made of wood and other renewable raw materials and to make a significant contribution to climate protection in the construction sector by storing CO₂.</p> <p>Object</p> <p>The amount of carbon stored as part of the following construction measures in the Free State of Bavaria is eligible for funding:</p> <ul style="list-style-type: none"> • New construction, extension and addition of storeys to buildings for the purposes of local authorities in timber construction (buildings for public purposes such as administrative buildings, buildings for social infrastructure such as nursing homes, homes for the disabled, schools and day care centers) • New construction, extensions and additions to multi-storey residential buildings in timber construction <p>The new building is to be planned with a gross floor area of at least 300 m² and the extension and addition of storeys with a gross floor area of at least 100 m².</p> <p>Type and amount</p>

Modul

Sachverhalt

The funding is granted as a subsidy. The type of grant is a project grant.

The grant is awarded as a subsidy without legal entitlement and within the scope of the available budget funds. The amount of the grant is 500 euros per ton of CO₂ stored.

Erforderliche Unterlagen

• Required Documents
 Darstellung des Gesamtkonzepts
 Bautechnische Unterlagen: Lageplan (M 1:1.000), Bauzeichnungen (M 1:100), Wohnflächenberechnung, Berechnung des umbauten Raums, Kostenberechnung nach DIN 276
 CO₂-Tool_Wood 1.0 - Nachweis der Herkunft nachwachsender Rohstoffe aus nachhaltiger Forstwirtschaft
 Nachweis Integrierter Planungsansatz für das Bauvorhaben
 Nachweis der Herkunft nachwachsender Rohstoffe aus nachhaltiger Forstwirtschaft
 De-minimis-Beihilfe Erklärung

Voraussetzungen

- Buildings that meet at least the energy standard corresponding to Efficiency House Standard 55 are eligible. The minimum energy standard for the newly constructed storeys or floors must be complied with in the case of measures involving adding storeys and extensions.
- Timber construction within the meaning of the directive is the use of timber in essential structural elements of buildings. For this purpose, at least the building envelope (outer wall) must be realized in timber construction and two other essential components must be realized in timber construction, such as in particular: the wooden roof construction, ceiling constructions made of wood or wood composite structures, interior walls in timber construction, stairs (overall construction), balconies (overall construction).
- Proof must be provided for the use of renewable, carbon-storing building materials. This is done using the CO₂-Tool calculation tool, which is used to determine the amount of renewable raw materials used and the associated storage quantity of CO₂.
- The eligible building materials must correspond to the current state of the art, be ready for the market and be suitable for the respective construction project and the construction method to be used. The use of

Modul
Sachverhalt

raw materials from sustainable production or management is also a prerequisite.

- Funding can only be provided for measures that have not yet been started.

Eligible applicants are local authorities, also in municipal cooperation in the form of special-purpose agreements and special-purpose associations as well as natural persons and legal entities under public and private law as well as companies and other associations under private law for measures according to No. 2.2 of the guidelines as well as for nursing homes, homes for the disabled, schools and day-care centers.

Exclusion criteria:

Only projects that have not yet been started can be funded.

Kosten

The application and approval process is free of charge.

Verfahrensablauf

- The application for funding must be submitted to the responsible district government using the currently valid application forms and the documents specified therein.
- Approval is granted within the framework of the available budget funds according to the order in which applications are received. There is no legal entitlement to funding.
- The government will arrange for the funds to be paid out and will check the proof of use.
