| Teaser                     | Village renewal improves living, housing, working and environmental conditions in rural areas. This sustainably strengthens the location and quality of life of villages in rural areas.   |
| Volltext                   | <p>The Bavarian Village Development Program aims to prepare rural villages or parts of municipalities for future requirements against the backdrop of demographic change, structural change in agriculture and climate change. Village renewal sustainably improves the infrastructural, economic and ecological conditions in the village, maintains or revitalizes the community spirit in the village and develops a strategy that ensures future-oriented development.</p> <p>The Rural Development Offices provide planning, financial and organizational support for villages with up to 2000 inhabitants. As part of a holistic approach, public and private measures can be implemented in the structural, design, ecological, economic, social and cultural areas.</p>  |

**Modul****Sachverhalt**

The active participation of citizens is crucial to the success of village renewal. They should have a say and be involved in decision-making so that they can support the results of the change process. Village renewal strengthens rural communities and their villages as sustainable, attractive and vital living spaces.
