Teaser	Only vehicles that meet certain minimum requirements in terms of pollutant emissions are allowed to drive in the designated environmental zones. To prove this, the vehicle must have a corresponding environmental badge, also known as a fine dust badge.
Volltext	<p>Since January 1, 2008, there have been environmental zones in several cities in Bavaria in which driving bans apply to vehicles with particularly high exhaust emissions. In these zones, only vehicles marked with an appropriate sticker or exempt from the driving ban are allowed to drive.</p> <p>Four pollutant groups have been defined, three of which are identified by stickers. These environmental stickers must be clearly visible on the vehicle behind the windshield. In order to ensure smooth control of vehicles in the environmental zones, it is advisable to affix them to the right-hand edge of the windshield.</p> <p>The environmental badge is valid nationwide. The validity is not limited in time. If the vehicle is re-registered and the license plate number changes, a new sticker is required, as the number entered on the sticker must match the license plate number.</p> <p>You can obtain the environmental sticker from the following offices:</p> <ul style="list-style-type: none"> • Vehicle registration authorities of the independent cities or districts • Approved bodies that are authorized to carry out exhaust emission tests (e.g. AU workshops, approved

Sachverhalt

testing organizations such as TÜV Süd, DEKRA, FSP, GTÜ, KÜS).

These organizations will determine whether your vehicle can be issued with an emissions sticker and, if so, which one. It will then be issued to you.

The following vehicle groups do not require a fine dust sticker to enter the environmental zone:

- Mobile machinery and equipment
- Work machines
- Agricultural and forestry tractors
- Two- and three-wheeled motor vehicles
- Ambulances and emergency vehicles
- Motor vehicles driven or driven by persons who are exceptionally disabled, helpless or blind and who can prove this by means of the "aG", "H" or "BI" markings entered in the severely disabled person's pass in accordance with Section 3 (1) Nos. 1 to 3 of the Severely Disabled Person's Pass Ordinance (Schwerbehindertenausweisverordnung)
- Vehicles for which special rights can be claimed in accordance with Section 35 of the Road Traffic Act
- classic cars (pursuant to Section 2 No. 22 of the Vehicle Registration Ordinance) that bear a registration number pursuant to Section 9 (1) or Section 17 of the Vehicle Registration Ordinance and vehicles that are registered in another member state of the European Union, another contracting party to the Agreement on the European Economic Area or Turkey if they meet equivalent requirements
- Vehicles belonging to non-German troops from states not party to the North Atlantic Treaty that are in Germany as part of military cooperation, provided they are used for journeys for urgent military reasons
- Civilian motor vehicles used on behalf of the Bundeswehr, insofar as they are used for journeys that cannot be postponed in order to fulfill the Bundeswehr's sovereign tasks

Other information:

- Quads and trikes: If your quad bike is registered as a "motorcycle" or "agricultural and forestry machine",

Modul

Sachverhalt

you do not need a sticker. However, quads that are registered as "passenger cars" require a sticker. Trikes are three-wheeled vehicles and as such are not subject to the entry bans in the environmental zone.

- Buses with tourists: In principle, all vehicles wishing to enter the low emission zone require a sticker. This also applies to buses taking tourists to events. If you have your company headquarters in the low emission zone and can prove that the vehicle cannot be technically retrofitted, you can obtain an individual exemption permit for a period of one year.
- Motorhomes: The same requirements apply to motorhomes as to other motor vehicles: without a sticker, driving in the low emission zone is prohibited.
- Classic cars: Classic cars are generally exempt from the driving ban if they display the classic car license plate "H" or the red 07 classic car license plate. This also applies to vehicles registered in another member state of the European Union, another contracting party to the Agreement on the European Economic Area or Turkey if they meet equivalent requirements.
- Munich blanket exemption: There is a blanket exemption for journeys to the wholesale market hall via Schäftlarnstraße. In this case, you can drive into the low emission zone without a sticker.

Erforderliche Unterlagen

- Registration certificate Part I or vehicle registration document

Voraussetzungen

You will receive an environmental badge for your vehicle if it belongs to one of the pollutant groups 2 to 4:

- Pollutant group 2: red sticker Diesel vehicles with emission standard Euro-2 / IIDiesel vehicles with Euro-1 / I emission standard that have been retrofitted with a particulate filter.
- Pollutant group 3: yellow sticker Diesel vehicles with Euro-3 / III emission standardDiesel vehicles with Euro-2 / II emission standard that have been retrofitted with a particulate filter
- Pollutant group 4: green sticker Diesel vehicles whose particulate emissions do not exceed 5 mg/kmDiesel vehicles with Euro-4 / IV, Euro-5 / V and EEV (enhanced environmentally friendly vehicle) emission standards,

Modul

Sachverhalt

i.e. particularly environmentally friendly vehicles that exceed the Euro-V emission standard (EEV standard is only specified for heavy commercial vehicles) Vehicles with gasoline engines from Euro-1 / I (gasoline or gas-powered) Vehicles with petrol engines prior to Euro standard status, but with a regulated catalytic converter (G-KAT), provided they either comply with Annex XXIII StVZO or have been retrofitted with a regulated catalytic converter in accordance with the 52nd exemption regulation to the StVZO Vehicles with an electric motor

If your vehicle falls into emissions group 1 (older petrol vehicles before Euro 1 and older diesel vehicles with emissions standard Euro 1 or worse), no sticker can be issued.

The classification of your vehicle into one of the four pollutant groups is based on the emission code numbers that you can find in the vehicle documents:

- old vehicle registration certificate: number 1, the fifth and sixth digits
- new registration certificate part I: field 14.1, the right two digits

Kosten

- at the vehicle registration authorities: 5 euros
- all other issuing offices have agreed to orientate themselves to this price
