Sachverhalt

01.01.2015. Measuring devices that were already in use before 01.01.2015 only have to be reported when they are renewed.

If a measuring device that has already been put into operation has been changed so significantly that a new conformity assessment must be carried out instead of verification (the decision is made by the verification authority), then this measuring device is considered to be renewed. A renewed measuring device is equivalent to a new __ measuring device and must also be reported (again).

If you use several measuring devices of the same type, you do not have to report each individual measuring device. According to § 32 Para. 2 MessEG, the notification can also be made by the user:

- informs or arranges to be informed of which types of measuring device he is using no later than six weeks after commissioning the first measuring device of a type of measuring device and
- ensures that overviews of the measuring instruments used containing the following information are made available to the competent verification office immediately upon request:
 - the device type,
 - the manufacturer
 - the type designation
 - the year of marking of the measuring instrument
- and
- the address of the person using the measuring instrument.

The notification obligation can be fulfilled electronically (see "Online procedure"). The verification offices confirm receipt of the notification.

If the notification is not made, not made correctly, not made in full or not made in good time, this constitutes an administrative offense under the MessEG and can be punished with a fine.

Modul	Sachverhalt
Erforderliche Unterlagen	
Voraussetzungen	In principle, all measuring devices used must be notified in accordance with the MessEG and MessEV. The obligation to notify does not apply to measuring standards such as weights or dispensing measures and not to additional equipment.
Kosten	none
Verfahrensablauf	
Bearbeitungsdauer	
Frist	New or renewed measuring devices must be reported to the responsible verification office no later than six weeks after commissioning.
