Hinweise	The funding program aims to ensure that voluntary investment projects lead to a reduction in environmental impact. The funding is therefore based on the tonnes of CO2 or CO2 equivalents avoided each year or the cubic metres of water saved.

# Modul

### **Sachverhalt**

The amount of funding is determined in funding priorities 2-7 by avoiding CO2 emissions. Irrespective of this, the following maximum permissible funding intensities apply with regard to the eligible costs (funding for eligible costs):

- in funding priority 1 (efficiency checks) a maximum of 50 percent,
- in funding priority 2 (energy efficiency) a maximum of 30 percent,
- in funding priority 3 (material efficiency and water) a maximum of 40 percent,
- in funding priority 4 (renewable energies for process heating/cooling) a maximum of 45 or 30 percent, depending on the method used to determine the additional investment costs,
- in funding priority 5 (unavoidable waste heat) for additional investment costs associated with the
- improvement of environmental protection, maximum 40 percent,
- in funding priority 5 (unavoidable waste heat) for generation plants a maximum of 45 percent and for investments in the distribution network a maximum of the difference between the eligible costs and the operating profit, but not more than 50 percent,
- in funding priority 6 (decarbonizing production) a maximum of 40 percent
- in funding priority 7 (flexible use of energy) a maximum of 40 percent

The amount of funding can be increased for micro-enterprises and small and medium-sized enterprises in funding priorities 2 (energy efficiency), 3 (material efficiency and water), 6 (production decarbonise) and 7 (flexible use of energy) by 10 percentage points and in funding priority 4 (renewable energies for process heating/cooling) by 5 percentage points.
