Teaser	The authority is checking whether there could be domino effects in neighboring operational areas. Share information about this with the relevant authority.
Volltext	<p>The competent authority is obliged to inform the operators of operating areas in accordance with the Major Accident Ordinance as to which operating areas or groups of operating areas may have an increased probability of major accidents due to their geographical location, their distance from one another and the hazardous substances present in their facilities, or in which these major accidents may have more serious consequences (domino effect). For the assessment, the authority requires from you in particular Information provided in the notification and the safety report, Information provided by the operator following a request from the competent authority for additional information and Information obtained by the competent authority through monitoring measures. As an operator, you also provide information about your immediate surroundings and</p>

	<p>the operating area. These include, for example, details to neighbouring operating areas, to other establishments that are not covered by the Major Accident Ordinance, and on areas and developments, from which an incident could occur or where the probability of an incident occurring may increase or the impact of an incident and domino effects can worsen. If the authority has additional information, it must make it available to you as the operator immediately, provided this is necessary for the cooperation between the operators. If a domino effect has been identified in operational areas, the potential hazards must be taken into account in the safety report, the accident prevention plan, the safety management system and the internal alarm and hazard prevention plans.</p>
Erforderliche Unterlagen	The responsible pollution control authority will request the necessary documents from you.
Voraussetzungen	no
Kosten	Fees apply. The amount of the fees is calculated according to the Environmental Fees Ordinance (UmwGebO) and depends on the time required for processing.
Verfahrensablauf	<p>Communicate the information in writing or electronically to assess an increased risk of incidents. The responsible authority initiates the procedure to determine a domino effect. The assessment is based on the information provided by the operator in the notification and in the safety report, the information provided by the operator following a request from the competent authority for additional information, and the information obtained by the competent authority through surveillance measures. If the conditions for a domino effect are met, you and, if applicable, other operators of other systems or businesses that are also affected will receive a notice of determination from the responsible authority.</p>
