Handlungsgrundlage	Regulation (EU) No. 576/2013 of the European Parliament and of the Council of June 12, 2013
Teaser	To travel with your pet within the European Union you need an EU pet passport.
Volltext	<p>If you want to travel within the EU with your pet, such as a dog, cat or ferret, you will need the EU pet passport as a travel document for your animal. It contains, among other things, the following information: Owner of the animal Description of the animal Identification of the animal (type and date of identification and identification number) Rabies vaccination (validity) Confirmation of a sufficient test result for the titration of rabies antibodies as proof of the effectiveness of the rabies vaccination if travel to non-listed third countries is intended. further vaccinations or treatments, for example against echinococci Even if you do not plan to travel with your pet, you can have a pet passport issued, as all vaccinations can be recorded there and a separate vaccination certificate is no longer necessary.</p>
Erforderliche Unterlagen	Pet passport according to Commission Regulation (EU) No. 577/2013 with the necessary entries (vaccination, titer test).
Voraussetzungen	The pet must have an effective vaccination against rabies. In addition, certain laboratory tests for antibodies are carried out if the animal disease situation in the third country is uncertain. Animals for which a pet passport is to be issued must be identified with a microchip.
Kosten	The authorized veterinarian shall invoice the costs for issuing a pet ID card in accordance with the fee schedule for veterinarians (GOT).
Verfahrensablauf	Registered bodies that are authorized to issue blank pet passports (printing legend companies) issue the

Sachverhalt

blank pet passports to authorized veterinarians. The Hamburg veterinarians are authorized by the responsible authority. The authorized veterinarian records the animal data, owner data, transponder injection data and fills out the pet passport by hand. The veterinarian gives the pet passport to the pet owner. The veterinarian can also transfer existing vaccinations to the new EU pet passport. If you travel to another EU country with your pet, carry the EU pet passport with you and present it upon request.

Hinweise

For travel within the EU with dogs, cats and ferrets the following are required: EU pet passport issued by your veterinarian with proof of the required valid rabies vaccination Identification by an electronic transponder (microchip) - (until July 2011, identification by tattoo is permitted on a transitional basis in many EU countries) The same travel regulations as within the EU apply to the following non-EU countries ("equivalent third countries"): Andorra Iceland Liechtenstein Monaco Norway San Marino Switzerland Vatican Croatia and for the following non-continental EU territories: Greenland and the Faroe Islands French Guiana, Guadeloupe, Martinique, Réunion Canary Islands Azores and Madeira To enter Finland, tapeworm treatment is also required. Ireland, Malta and Sweden have their own additional regulations for importing pets. Here, you

Sachverhalt

must have the animal's blood tested for rabies antibodies in an approved laboratory before you travel (also required when re-entering from a "non-listed third country"). In addition, these countries require treatment against ticks and tapeworms. In addition, a microchip is already the only acceptable form of identification there. Travelling with animals other than dogs, cats and ferrets (e.g. birds and rabbits) and Travel to non-EU countries ("listed and non-listed third countries"): The general rule here is: Please get information in good time from your veterinarian, the relevant embassy or on the websites of the Federal Foreign Office or the Federal Customs Administration. This now also includes Great Britain.

Rechtsbehelf

None.

Kurztext

Apply for an EU pet passport EU pet passport issue Identification document for pets when travelling Movement of pet animals for non-commercial purposes by private individuals, which does not aim at the sale of a pet animal or the transfer of ownership of the pet animal. Accompanied by a pet passport drawn up in accordance with the model laid down in implementing acts, which allows the pet and its health status (for example, rabies vaccination) to be clearly identified.
