Handlungsgrundlage	§ 18 (1) No. 5 Industrial Safety Ordinance (BetrSichV) Designation: LV 49 - Explanations and instructions for carrying out the approval procedure in accordance with Section 18 of the Industrial Safety Ordinance
Teaser	If you have a filling point for flammable liquids with a flash point <23°C and a handling capacity >1. If you want to build, operate or make certain changes to the facility that affect the safety of the system, you must apply for a permit.
Volltext	Filling points are systems that are permanently installed or used permanently at the same location and have a handling capacity of more than 1000 liters per hour. At filling points, transport containers are filled with flammable liquids with a flash point <23°C. This is a facility that requires monitoring. You need permission from the relevant authority if you: would like to build and operate a filling station want to make changes to the design or operating method that affect the safety of the system Permission may be granted to you subject to the following restrictions: limited limited under conditions with conditions If the facility requiring a permit is part of a facility requiring a permit, no separate permit will be issued. Approval includes permission.
Erforderliche Unterlagen	Informal application with the following information: Last name, first name, company name Applicant's address Contact information (email, telephone, fax)

**Modul**
**Sachverhalt**

Information about what type of permission is desired  
 Construction and operation Change and operation or  
 Partial permission Indication of the operating location  
 Documents to be able to assess the system: Subject of  
 the application Description of the facility Description of  
 the system technology and interaction with other  
 systems Piping and instrument flow diagram (P&ID  
 flow diagram) Safety data sheets Description of  
 operation Overview plan Site plan Floor plan/technical  
 plan Ex zone plan Explosion protection concept Fire  
 protection information Description of the liquid-tight  
 area Calculation of manufacturing costs Other facilities  
 Test report from an approved monitoring body (ZÜS).  
 The test report must confirm that the system can be  
 operated safely if the measures mentioned are  
 adhered to.

**Voraussetzungen**

The system for which you are applying for permission  
 must be a system that requires permission. You must  
 build and operate filling stations using state-of-the-art  
 technology. Your documents must be complete,  
 plausible and meaningful. The test report from the  
 approved monitoring body (ZÜS) must confirm that the  
 system applied for can be operated safely if the  
 measures specified in the documents, including the  
 tests, are adhered to.

**Kosten**

Fees are charged for processing the permit application  
 in accordance with the fee schedule for the areas of  
 occupational safety and plant and product safety  
 (ArbSchGebO HA). The amount of the fee depends on  
 the time required to review the application documents  
 and prepare the permit

**Verfahrensablauf**

Submit the application for approval of the system  
 requiring monitoring with the necessary documents,  
 including the test report from the approved monitoring  
 body (ZÜS), to the responsible authority. If there is a  
 requirement for approval under the Federal Immission  
 Control Act, you will receive the application documents  
 back, as a permit under the Industrial Safety Ordinance  
 will then be checked as part of the necessary approval  
 under the Federal Immission Control Act. The  
 responsible authority will make its decision after  
 review and communicate it to you.

Modul	Sachverhalt
Bearbeitungsdauer	The competent authority must decide on the application within three months of receiving it.
Frist	The permission expires if: You have not started construction of the facility within two years of the permit being granted You have interrupted the construction of the system for two years or longer You have not operated the system for a period of three years For important reasons, you can apply to the licensing authority for an extension of the deadlines.
weiterführende Informationen	
Hinweise	The application documents can also be submitted in digital form.
Rechtsbehelf	Contradiction: You can object to the decision within one month of the announcement. You must submit the objection to the responsible authority in writing or for recording.
Kurztext	Ensuring operational safety - apply for permission to set up and operate filling stations Construction and operation of a system requiring monitoring in accordance with the Industrial Safety Ordinance Permitting filling points A filling point is a facility that is permanently installed or used at the same location and has a handling capacity of flammable liquids (flash point < 23°C) of more than 1000 liters per hour They are "systems requiring monitoring" that must be assembled, installed and operated according to the state of the art. Anyone who wants to build or operate such a filling station or make changes to its design and operation requires a permit. Permission can be granted: under conditions limited limited be subject to conditions Application: You can submit the application informally in writing or electronically. An application for partial permission is possible. The Office for Consumer Protection is responsible.
