Handlungsgrundlage	§ 18 (1) No. 4 Industrial Safety Ordinance (BetrSichV) LV 49 - Explanations and instructions for carrying out the approval procedures in accordance with Section 18 of the Industrial Safety Ordinance
Teaser	If you want to build, operate a storage facility for flammable liquids with a flash point <23°C and a capacity of more than 10,000 liters or make certain changes that affect the safety of the facility, you must apply for a permit.
Volltext	Storage facilities are rooms or areas that are used to store flammable liquids with a flash point <23°C and a total volume of more than 10,000 liters. These are systems that require monitoring. You need permission from the relevant authority if you: would like to build and operate a storage facility want to make changes to the design or operating method that affect the safety of the system Permission may be granted to you subject to the following restrictions: limited limited under conditions with conditions If the facility requiring a permit is part of a facility requiring a permit, no separate permit will be issued. Approval includes permission.
Erforderliche Unterlagen	Informal application with the following information: Last name, first name, company name Applicant's address Contact information (email, telephone, fax)

Modul

Sachverhalt

Specify the type of permission desired: Construction and operation Modification and operation Partial permission Indication of the operating location Documents to be able to assess the system: Subject of the application Description of the system and filling location Description of the system technology and interaction with other systems Piping and instrument flow diagram (P&ID flow diagram) Safety data sheets Description of operation Description of the joint storage and list of the requested storage classes Overview plan Site plan Floor plan/technical plan Ex zone plan Explosion protection concept Fire protection information Description of the permanent retention volume Calculation of manufacturing costs Other facilities Test report from an approved monitoring body (ZÜS). The test report must confirm that the system can be operated safely if the measures mentioned are adhered to

Voraussetzungen

The system for which you are applying for permission must be a system that requires permission. You must build and operate storage facilities using state-of-the-art technology. Your documents must be complete, plausible and meaningful. The test report from the approved monitoring body (ZÜS) must confirm that the system applied for can be operated safely if the measures specified in the documents, including the tests, are adhered to.

Kosten

Fees are charged for processing the permit application in accordance with the fee schedule for the areas of occupational safety and plant and product safety (ArbSchGebO HA). The amount of the fee depends on the time required to review the application documents and prepare the permit.

Verfahrensablauf

Submit the application for approval of the system requiring monitoring with the necessary documents, including the test report from the approved monitoring body (ZÜS), to the responsible authority. If there is a requirement for approval under the Federal Immission Control Act, you will receive the application documents back, as a permit under the Industrial Safety Ordinance will then be checked as part of the necessary approval under the Federal Immission Control Act. The
