Teaser	Even decades after the end of the Second World War, many explosive ordnance and unexploded ordnance still lie undiscovered underground. Due to the effects of weather, chemical decomposition, corrosion or deformation as a result of impact, the sensitivity and thus the danger of found ammunition / ordnance is considerably higher.
Volltext	If a private individual, company or official institution wishes to carry out construction work on the property, there is an obligation to apply for an inspection of the property. Military explosives can remain effective almost indefinitely. In addition, safety elements may have been rendered inoperative by launching or dropping. Change of position, mechanical action, or even picking up an explosive device can trigger detonation. There is therefore a risk to life when handling explosive ordnance / found munitions.
Erforderliche Unterlagen	
Voraussetzungen	• Requesting the inspection of the property; • Ensuring the explosive ordnance disposal service, within the scope of its possibilities, that hazard-free work can be carried out in the civil engineering segment during construction projects; • On areas classified as suspicious areas, where interventions in the building ground (this can also be the case with demolitions!) are to be carried out or where filling or sealing of areas is planned, there is an obligation to have these areas examined. Only the police are responsible for this classification of "suspected areas". These inquiries are obligatory by law.
Kosten	For example, if a grenade is found by chance in the garden of a property, it will be removed free of charge

Modul	Sachverhalt
	for the property owner. This also includes the destruction of the explosive ordnance (so-called accidental finds).
Verfahrensablauf	Please contact the responsible office.
Bearbeitungsdauer	6 Woche(n) The processing of an application usually takes 4 to 6 weeks
Frist
