Teaser

Do you want to divide a property (parcel) into 2 or more properties (parcels) or have them divided?

Volltext

In order for a division to be made in the land register, a new parcel must be formed in the locality and on the cadastral map. For this purpose, the land surveying and cadastral office carries out a survey of the parcel.

The decomposition survey serves to form new parcel boundaries and thus to create new parcels. The course of a new boundary depends on an existing property purchase contract or on the wishes of the owner or purchaser. Planning and building regulations (e.g. compliance with border distances) must be taken into account. In a subsequent surveying appointment, the results of the surveying and the marking out are made known to the parties involved.

The surveying results are transferred to the real estate cadastre.

Erforderliche Unterlagen

Voraussetzungen

The (written) application for surveying can be submitted by the owner of the land plot or by someone who can prove a justified interest (e.g. buyer) and acts in agreement with the owner of the land plot. The application must state who will pay the fees for the survey.

Kosten

depending on the size of the order, at least 1500 euros, depending on the value of the land, the size and the
